

Business Profile:

1 location, 115 student average, 15 teachers
Heather Gingrasso, Program Director

Heather's Challenge:

Heather found working with a PC-based system cumbersome, time-consuming and wrought with potential inaccuracies. She knew that the best route to take with school management software would be a web-based solution. As choices were narrowed, Jackrabbit rose to the top because of its web-based platform. And Jackrabbit's billing capabilities were icing on the cake!

The Details:

Heather saved a tremendous amount of time with the implementation of Jackrabbit since she no longer had to update multiple computers. Her entire team became more confident in their data accuracy because the worry of out of sync computers was eliminated.

The Jackrabbit system gives Heather very comprehensive student and billing data and makes it easy for anyone on staff to look up any details that are needed - regardless of where they are working. Jackrabbit's accounting feature set makes quick work of monthly billing cycles - and provides summary pages so that cross-checking is simple.

Central Christian Academy became proficient with Jackrabbit almost immediately because of the solution is intuitive and easy to use. Any questions that arose early on - or as they continue their work with the system - are answered in the training videos that Jackrabbit provides from their website.

"Jackrabbit Care has made managing our day-to-day tasks much easier. I don't know how we managed with a PC-based system in the past. Jackrabbit's web-based format is liberating. Whether I need to answer important questions for parents or double-check work done by other staff members, I can now do so from my home. The system is easy to learn and use - and that says a lot since I'm not very computer savvy!"

Heather Gingrasso

Jackrabbit's Value:

- The web-based format releases schools from dreaded sync cycles.
- Access through the Internet allows work to be done at any time, from any location.
- Ease of use makes adoption of the system quick, painless - maybe even fun!
- Data is readily available. A click or two and necessary details are at hand.
- The time it takes to complete monthly billing cycles is greatly reduced - and accuracy is increased.
